9 2. Methods

10 Footnotes can be entered using this code¹.

11 Figures are included like this.

12 And referenced from here as Fig. [1](#).

13 Complex tables can use standard LaTeX code as this one.

14 Equations can be used inline $y = \beta_0 + \beta_1 x + \epsilon$ or as usual

$$f(x) = \frac{1}{x}$$

Table 1: Probability to observe Bayes Factors of a certain magnitude or above for the used sample-size of $N = 60$ assuming the original and the null-hypothesis.

Hypothesis	BF Type	$P(\text{BF} \geq \theta)$
